

Please keep the FCC regulating broadband service. Please don't allow BellSouth to succeed in it's petition. It is very important that small Internet Service Providers remain viable - they provide services that the large companies will not provide. I use a smaller ISP because of those services and without regulation, the large Bells will pursue policies that will destroy smaller ISPs. The smaller ISPs are also very responsive to small businesses, where the larger Bell is not and will never be responsive. I say this as a BellSouth stockholder - BellSouth will not suffer by being restrained from choking out small ISPs.
